### JOB PRINTING.

In our yesterday's issue we alluded to the industrial and commercial condition of California. The statistics presented to our readers were necessarily, from their brevity, imperfect: but they were sufficient to show that in commerce California, like ourselves had declined, but in home production, unlike ourselves, had immensely increased. Population had remained almost stationary, and in this respect the progress of the State might be open to question. While, however, the normal condition of every prosperous new country is a continuous influx, there are times when even a stationary attitude is a mark of vitality. In many countries v.hen reverses take place, the influx becomes the exodus, and a stream of emigration is poured T SALE. TO ARRIVE PER out much too great in volume for any incom ing flow to counteract or replace. With all the reverses which have befallen California the past ten or twelve months we find the native industry of the place rapidly progressing. The manufacture of woollen goods is largely on the increase. Out of the six million pounds of wool, the estimated produce of this year's crep, it is anticipated that the home manufactories will absorb two millions. This speaks wonders for a young country like California. and shows how well she has utilised her gold fields. Independent, however, of the numerous home industries that have sprung up, and are daily springing up, the export of her produce is truly remarkable. In the article of flour, she sends away on the average during the year, six or seven hundred thousand dollars worth; of wheat in the first six months of last year, she exported \$674,-000; the cause of the enormous falling off this year has been already explained; but we may put the yearly export, under ordinary circumstances, down at eight hundred thousand dollars; barley and oats will foot up ordinarily to sixty or seventy thousand. The exportation of hides will run up to a million and a quarter; quicksilver to a million and a-half; and wool to about a million. Altogether the yearly exportation of home productions, exclusive of treasure, will reach somewhere in the vicinity of \$7,000,000. Of the export of flour Vancouver Island is the second best customer; Hongkong being the first. During the six months ending June, we imported \$18,000 worth, Hongkong taking \$49,600. Of barley we are also the second importer, and of oats the same-although in both cases our half-yearly importations have only reached about \$4000. Our total imports from California for the past six months are \$712,000, showing a decrease when compared with the same period last year of \$111,000. With the exception of Mexico and the Eastern States-which import \$2,400,000 and \$1,000,000 respectively-we are California's best customer The remaining importers of merchandise from California are in their respective order, as follows': China, Sandwich Islands, Great Britain, Australia, Peru, Chili, Central America, Pacific Russia, New Zealand, Japan, and the East Indies. It would appear from

this list that San Francisco, with all her

heavy import duties, is in no way circum-

scribed for markets, but is virtually the great

aspiration which of wont used to lead astray

the minds of many of our own population.

trade. Her commercial intercourse with

Mexico, China, Australia, and even Japan, is

anticipated to increase rapidly during the

next few years. It is vain for us to dream of

disputing the commercial palm with this flourishing American State; as well might we think of rivalling Great Britain in manu-

factures. The rubbish that is occasionally

published about European shippers getting disgusted with the San Francisco Customs

regulations, and looking about them for a

free port, is too silly for consideration. Our

commercial prospects will only brighten

when our mines are yielding their old quota,

and our industries keeping a population in

the place; all the Gaultiers or "Bon Gaul

tiers" in the world cannot add to our

prosperity if these things are at a dis-

count. Had the people of California pos

session of these colonies to-morrow

we should hear of no inane drivelling about

a paltry cattle tax. We should have ou

natural resources speedily turned to account.

The coal that is in such extensive and in-

creasing demand all along the Pacific, and

would soon become a source of employment

to thousands of men and hundreds of ships

The same might be also said of our other

but still hidden resources. Our citizens have

in fact become too enervated by "keeping

shop." We want now what the colony has

wanted from the commencement-more pro-

ducers of wealth and fewer distributers of

wares. When the equilibrium in this respect

has been attained, we shall be in a fair way

of rivalling California-not in her exports

and imports, but in what is of more import-

THE STATE OF THE STREETS-The putrid and pestilent odors which assail our nostrils in almost every street, are rendering the city well-nigh uninhabitable. The air is fair! reeking with abominations; sight and smell are alike outraged by the presence of the decaying carcasses of dogs, cats, &c., on our City Council are willing to act, but helpless the means-thanks to the sapient senators and scribes who succeeded in killing the Incorporation Bills. We think the latter body might still, however, make good use of body might still, however, make good use of the modicioum of power left them in abating the nuisance. A few barrels of lime in the gutters would purify the street, the money for purchasing which the public would gladly contribute by voluntary subscriptions; and if the Council would use their undoub power to indict fines on those who are the cause of the nuisance, the city might shortly be restored to its wonted cleanliness. We e the matter may receive the earnest attention of our civic authorities at their meet ing on Monday night.

EXPLORATION OF KOKESAILAH RIVER-From Mr. Hector McPherson, who, with Mr. Robertson, has been prospecting for gold since June 1st, on Kokesailah river, Cowichan district, we learn the following particulars: The party ascended the river about 35 miles, prospecting all the way up. and finding color everywhere. At a distance of 35 miles they were encouraged from the appearance of the stream to sink a shaft in the high bank, which they did to the depth of 12 feet, finding several colors. They were obliged, however, through the water coming in and grub becoming scarce, to give up for the present. They intend they give up for the present. They intend they say, to return at once with supplies and material for rigging a temporary pump. The country is very rough, with occasional flats, heavily timbered. On the 18th June the country is recorded a mountain near the head heavily timbered. On the 18th of one the party ascended a mountain near the head waters of the river, after four and a-half hours hard climbing. It was named by the oxplorers Mount Waterloo. They discovered a remarkable lake in that vicinity, at an elevation of about 1000 feet above the river, and they with a first stream descended in a rom which a fine stream descended in a eries of beautiful waterfalls. GONE Ur-The new stern-wheel steamboat Onward sailed for New Westminster last night at 7 o'clock, carrying up Captain Irving and family. The boat not having been inspected, Capt. Irving declined to take any passengers, as by doing so he would incur the liability of a fine of \$500. NAPOLEON'S HEALTH-A Paris letter says the Emperor Napoleon astonishes everybody by his unalterable health. Bodily weariness, enormous heat, fatigue from work-nothing overcomes him. He is always bright and well, the first to be ready, while some of his suite appear singularly fatigued.

A VICTORIAN CELEBRITY -A correspondent informs us that Duncombe, of forlorn memory, has started a saw-sharpening shop in Kearny Street, San Francisco, having wisely determined to let Victoria and its reminiscences glide from his memory.

It is stated by a Montrenl paper that ten Southern rebels have \$10,000,000 deposited in banks in that city.

" Sozopont" is now attracting very considerable attention, and well it may. The article represented by this musical name is one of the best preparations for the teeth and one of the best preparations for the teeth and gums that has ever been affered to the public. We have been familiar with its results for some years past, and have never known a case in which its use was not pleasing and highly satisfactory. It polishes the teeth hardens the gums, and gives a wholesome tone to the mouth and breath.—Providence, Datly Press.

ACCIDENT-NARROW ESCAPE AT YALB-As Mr. A. M. A. Gleason, the well known and gentlemanly mate of the steamer Lillooe was driving out with two young ladies (the daughters of Mr. Romano, of Yale), the norses became suddenly unmanagable, upsetting the carriage and smashing it to pieces. setting the carriage and smashing it to pieces. The ladies were thrown riolently to the ground but luckily were not soriously injured. Yr. A large log building at Fort Shepperd and a log house at Kamloops were shitted two or three feet by the violence of the wind, and at the latter place a wagon was rolled several times over. A violent thunderstorm prevailed during the hurricane.

AN IMPORTANT DECISION .- His Hono Chief Justice Camerot gave an important decision in the Supreme Court yesterday, which will affect the transactors of all Joint Stock caying carcasses of dogs, cats, &c., on our main thoroughfates. Should any contagious disease break out, the community would in all probability be almost decimared by its ravages, aggravated tenfold by the deadly effluvia that meet us at every step. What is to be done? The Government are as beed less of the outcries of the public as their ollastories are of the offensive oders; the Cliv Council are willing to act, but helpless no personal notice of the cars being made bad been given. His Hong decided that per-sonal service of the notice of call was required by the law, and ordered a non-suit to be entered. Mr. Cary, instructed by Mr. Cop-lend, appeared for the Company.

THE BROAD STREET ROBERTY .- H. Gardiner was brought up on remand yesterday charged with robbing Madame Maitre, the French green-grocer on Broad street. The Magistrate said as any observation from him on the case might probably deleat the ends of justice he would only say that he did not consider the evidence sufficient to send the case up for trial, and he would herefore discharge the prisoner. Gardiner accordingly thanked the Magistrate and left the Court.

The French poet, M. Amand, was one day at an assembly where a prominent figure was a man with black hair on his head, and a white beard to his chin. A lady inquired of M. Amand if he could explain the contrast, 'I suppose, madam, he replied, 'the gentle man's chin does more work than his head.'

In 1762, the celebrated Dr. Thomas Blacklock was presented to the living of Kirkend-bright. The doctor labored under the loss of eyesight. When he was preaching one of his eyesignt. When he was preaching one of his trial discourses as presentee, an old woman who was seated on the pulpit stairs inquired of a neighbor whether he was "a reader." "He canna be a reader, for he's blind," responded the neighbor. "I'm glad to hear 't." rejoined the old wile; I wus they were a' blin!"

Not many miles from Boston, two sisters, by the name of Pepper, are employed in the same establishment. One of them has red huir and goes by the name of 'Red Pepper, while her sister with black bair is known as 'Black Pepper.' A male relative is also employed in the same place, and is called 'Pepper and Salt'—his hair fairly representing that mixture.

Holloway's Ointment.

Contracted or Stiff Joints.

All the medicines in the London dispensaries would barely benefit, much less cure, any chronic cases of contracted or siff joints; whereas if this invaluable ointment be effectually rubbed into such parts twice a day, the effects will be immense Paralytic patients even can derive advantages from this fine remedy when other means fail.

Scorbutic Humours,—Scald Head and Skin

Diseases. Diseases.

Scorbutic humors arise from an impure state of the blood, and in roost cases the liver and stomach are the organs at fault. The Pills will speedly restore these to a healthy action; while the Ohnt ment if well ruthed in teast twice a day, will soon cure any case of skin disease. Soldiers, sailors, and minere, use this famous Ointment in all parts of the world.

In any of the above complaints more benefit may be derived in twenty-four hours by adopting the following simple means than is frequently brough about in six months by any other treatment. In ban cases if the Gintment be rubbed into the small of the back over the region of the kidneys, it will quickly penetrate, and, in most instances, give immediate relief—Six or eight of the Fills six did be taken nightly according to circumstances.

Diptheria, Soro Throats, &c.

Diptheria, Soro Throats, &c.

These maladies are of so serious and dangerous a nature that the Ointment would not be recommended unless the Proprieter was sure of its effect. It will cure when every other means have failed, if applied immediately, and not delayed unithe path at its beyond recovery. It is a severeign remedy for sore throat. Settled-Coughs or wheezing will be promptly removed by rubbing in this unquent. Mothers should rub it into the chiest of heir infants whenever there is any hourseness, ightness, or other affection of breathing.

and Ulcers.

It is surprising how quickly a sore, ulcer, or wound, deprives the body of strength, and unfits it for the duties of life; but it is no less wonderful to waten the cifect of Holloway's Realing Ondment, when it is used according to the printed directions, and assisted by appropriate doses of the Pills. The pain, inflammation, and other morbid manifestations, soon disappear from the affected part and health and strength return.—This treatment creates sound flesh, and therefore makes its cures complete. and Ulcers.

makes its cures complete.

Gout and Rhoumatism.

Will be cured with the greatest certainty if lad quantities of the Colimbia be well worked in the complaining parts. This treatment must perseveringly followed for some time and dussisted by powerful doses of Holloway's P. Andrew Robertson, — HAS REMOYED TO—

Hollowat's Pills and Ointment—Deranged Stomach, Sick Headache.—Our comfort, happiness, and security depend on the knowledge that most diseases originate from apparently a triffing beginning, and that the large proportion of them spring from inattention to the state of the stomach. Professor Holloway has turned his knowledge to useful account by discovering medicines which cure, without exception, the attendants on disordered digestion. They ward off, lifewise, the torturing sick headache. The Ointernational control of the stomach of the control of the story of the story

Hollowars Pills .- General debility. Hollowars Fills.—General debility, low spirits, and nervous irritation, are the consequences of dyspepsia or indigestion. The Pills soon give tone to the stomach, renorate the digestive powers, purify the blood, and give strength to the whole system. Sluggishness of the body and depression of the mind are succeeded by a cheerful activity of the physical and mental functions. Indigestion is the parent of so many evils, and is zo common, so universal a complaint, that it is a great biesing that such a remedy as this invaluable medicine should have been discovered. No one need long suffer from indigestion with these Pills at hand.

Holloway's Pills are deciledly the best remedy for all disorders of the stomach and bowels, the liver and kidneys. They act with so decided an effect, and yet so gently, that people of the most delicate constitutions may take them with the most perfect confidence. They do not contain one grain of mercury or other noxious substance, being composed exclusively of rare balsams. They are, therefore, equally safe and effeccious, and as a family medicine, nothing yet invented or discovered can be compared with them for a moment. With these inestimable Pills at hand, together with the printed directions affixed to cach box, no other medical advice or assistance can be needed in any ordinary case of sick.

Hollowar's Ointment and Fills—Acute Rheumatism. In all severe pains in the joints and muscles, after due fomentation with hot water, the soothing action of this Ointment is most remarkable; it seems at once to lessen inflammation, ease pain, reduce the swelling, restore the free circulation, and expel the disease. In these complaints, indeed, Holloway's Ointment and Pulls are an infallible specific. The Ointment should be rubbed as near the part in pain as the paticular can bear; it is absorbed and directly conveyed to the diseased textures, when, acting on nerves, vessels, and guiders, it will arrest disease and again establish healthy action. The aperient and purifying qualities of the Pills have the happiest effect in assisting the Ointment.

HOLLOWAY'S CINTMENT AND PILLS—Palpitation, Shormess of Breath, Dropsy—This last named disease is often preceded by irregular action of the heart, and difficult respiration which symptoms are always severe, and ever go from badto worse, unless proper means of cure be resorted to. In Holloway's unrivailed Ointment and Pills' the dronsical patient will ever find succour; the present relief derived from the use of these remedies is marvellously quick, and perseverance in the steady application of this noble Ointment invariably results in a lasting and satisfactory cure. The two medicines act with such energy on the circulation and aborbent system, that the dropsical fluid vanisher, and the suffers and all the oppressive symptoms daily decline; till matural health returns.
